Native V2 routing declarations
handoffTarget
groundedAsset
Entity (asset)
sceneObject
Agent
kind: agent
groundedObjectGroup
Entity (asset)
objectGroup
responsibleZone
Entity
kind: zone
provider
Specificity
asset > group > zone
Exactly one provider at
the first nonempty level
Declared answering path: s → u → c → b → a
ScenarioStep
CapabilityUse
Capability
RuntimeBinding
RuntimeAction
target
Entity (asset)
sceneObject
A step names a capability use;
it never invokes an action directly.
Runtime only (not metamodel): session pin + model digest + commit fingerprint
